

Syllabus

Macro-economics Syllabus
ECON 2301 **Section:** 4H21
2026 Spring

Course Information

Credit Hours: 3

Term: 2026 Spring

Course Days: TTH

Course Times: 11:00 AM to 12:20 PM

I want to welcome you to "Introduction to Macro-Economics" class 2301 4H21. My name is Carl Wechter, and I will be your professor for this class which meets Tuesday and Thursday mornings from 11:00 to 12:20 in room F311.

Many of you are freshmen and this may be your first year of attending college. Economics has a language of its own and you will likely find this class somewhat more challenging from both a content and work requirement perspectives than your High School classes. However, if you attend the classes, take the time to read the text, ask questions, review the slides and do your homework assignments you'll do fine. I am here to help you as much as you need.

I will make a dedicated effort to make this a rewarding and hopefully

enjoyable learning experience for you. I welcome class participation – I may not always have answers to your questions but if I don't, I'll make note of the question and follow-up with an answer in our next class. I expect students to be respectful not only to me but to fellow students – no constantly viewing your cell phones, no unending side conversations, no falling asleep – your young adults in college. Success in class entails a partnership between the teacher and student - you need to do your part as well by doing homework, exams and engaging in class.

A quick summary of my background. For approximately 40 years (yes, I'm older) I primarily worked in the business sector (BP, Accenture, Baker Hughes, two years for government) as Financial/Economic/Accounting Analyst and Manager. I hold graduate degrees in Economics and Finance from Miami University of Ohio and Ohio State University – I'm a strong Buckeyes football fan. I grew up in Brooklyn, New York, quite a difference from my current life in The Woodlands. My family didn't have much money so I was fortunate that New York City offered essentially free college as part of the City University System - I attended Brooklyn College. While teaching I try to bring my business experiences into the classroom, so you get a sense of how economics applies to the business world.

Please read the entire syllabus which details class and Lone Star College expectations and critical deadlines, planned due dates for homework, tests, paper, grading requirements, extra credit options (your choice) and other helpful information to get you through the semester. Please note I stress that, dates for homework, exams etc. may change depending on class progress or other circumstances. These changes will be reflected in D2L under the course content – you are responsible for checking D2L on an on-going basis for assignment due dates! I also suggest you build a rapport with some other students in class in case you miss a class or need help with an assignment.

As this course is comfortably taught over a 16-week semester, because this is a 14-week semester, chapters/assignments will be accelerated – it's very likely I will not be able to cover all the material in class. It's a "hybrid" because all exams, homework assignments and final are done on line and we're compressing about 16 weeks of work in 14 putting a burden on you to stay on top of the work. All slides will be uploaded into D2L in the appropriate module (under course content) and you are responsible for reviewing the slides prior to class and anything not discussed due to time, you are still responsible to know. You can email me any questions you have at my above email or we can meet after 2:00 PM Tues/Thurs in the business office -ideally you should arrange a time to meet as I don't have a permanent office.

Note there are two extra credit options, one pertains to attendance and one to reading Smart Book - your choice if you wish to do. There is also a grade penalty for poor attendance - it's in the syllabus; make sure you know this!

Key points to remember:

- Take responsibility for your actions - Stay on top of your readings
- Please Read my emails – if I send them, there is a purpose to them
- Consistently Check D2L for due dates on what you need to complete (HWK, Exams, Final). Under course content in D2L I have established modules by Exams and associated homework. Access McGraw Hill Connect through D2L to do your homework, exams and Final.
- Speak-up – no wrong answers
- Do your homework – you have 2 chances, helps you learn the subject and it's an easy 15 to 20 points
- Allow yourself 3 to 4 weeks to complete your paper – don't miss the deadline!
- I may not always have an answer – hey, I'm older and forget – but I'll follow-up
- Please read the syllabus

Instructor Information

Carl Wechter

Email: Carl.Wechter@lonestar.edu

Office Location

I don't have a permanent office so ideally you should email me if you wish to meet or ask after class. I will need to arrange space in BHSS' office area.

Student Engagement Hours

As noted above you need to arrange a time with me, preferably at 2:00 PM Tuesday and Thursday

Department/Division Contact

Frank.A.Granack@Lonestar.edu. Chair of Economics.

Course Overview

Description: An analysis of the economy as a whole including measurement and determination of Aggregate Demand and Aggregate Supply, national income, inflation, and unemployment. Other topics include international trade, economic growth, business cycles, and fiscal policy and monetary policy.

Prerequisite(s): Prerequisites: College Level Readiness in Reading AND Writing; MATH 0308 or More Advanced Math or College Level Readiness in Math or Placement by Testing in College-Level Math

There is a fair amount of material to be covered in a 14 week semester so at times you may feel rushed. In addition many of the chapters build upon information from prior chapters. However, as a student if you stay on top of the readings and homework you'll do fine. While economics may seem like an esoteric subject the critical concepts and understanding of what drives our macro economy is critical to your understanding of what drives a business or on a more personal basis how to invest your savings.

Student Learning Outcomes

1. Explain the role of scarcity, specialization, opportunity cost and cost/benefit analysis in economic decision-making.
2. Identify the determinants of supply and demand; demonstrate the impact of shifts in both market supply and demand curves on equilibrium price and output.
3. Define and measure national income and rates of unemployment and inflation.
4. Identify the phases of the business cycle and the problems caused by cyclical fluctuations in the market economy.
5. Define money and the money supply; describe the process of money creation by the banking system and the role of the central bank.
6. Construct the aggregate demand and aggregate supply model of the macro economy and use it to illustrate macroeconomic problems and potential monetary and fiscal policy solutions.
7. Explain the mechanics and institutions of international trade and their impact on the macro economy.
8. Define economic growth and identify sources of economic growth.

STAR Bundle

Students in this course are automatically enrolled in the STAR Bundle, which provides access to all required course materials by the first day of class. The cost is charged to your student account and is included in your tuition and fee statement.

PLEASE NOTE: Continuing Education (CE) courses are NOT part of STAR Bundle.

Digital materials are available in D2L, our Learning Management System (LMS). If your course includes physical materials, you'll receive an email when they're ready for pickup at your home campus store.

You may opt out of the STAR Bundle, but if you do, you'll be responsible for purchasing all required materials on your own.

For more details, visit [LoneStar.edu/starbundle](https://lonestar.edu/starbundle).

Dual credit courses offered at high school locations in **Cypress-**

Fairbanks ISD, Lamar CISD, Incarnate Word Academy, and Calvin Nelms Charter High School DO NOT participate in the STAR Bundle.

Course materials for these sections are provided at no cost to the student by the high school or through open educational resources. The STAR Bundle applies only to courses taken at a Lone Star College campus, regardless of whether the high school student is enrolled for dual credit or college credit only.

Required Text(s) and Materials

Macroeconomics 23e

ISBN 13: 1265279268

Authors: Campbell R. McConnell, Stanley L. Brue, Sean M. Flynn

Publisher: McGraw Hill

Publication Date: 2024

Edition: 23

Notes

The student needs at minimum the digital version of the text in order to access all exams, Final, extra credit and homework assignments. There are other ISBN codes for this text but to get the reduced price for this text the McGraw Hill advisor indicates you should click directly on a Connect assignment link within D2L to access. That is where students can order the text at a reduced price (vs. Bookstore or directly from McGraw Hill) - you also have the option for an additional fee to also get a looseleaf version of text.

Technology Requirements

In our efforts to prepare students for a changing world, students may be expected to utilize computer technology while enrolled in classes, certificate, and/or degree programs within Lone Star College. The specific

requirements for this course are listed below:

Digital Version of the text listed above and access to computer to read chapters and do the exams, final, homework and extra credit. You must access McGraw Hill Connect thru D2L under the course content.

Important Course Dates

Course Start: 2026-02-02

Course End: 2026-05-17

Course Length: 104

Official Day of Record (ODR): 2026-02-11

Midpoint Day of Record (MDR): 2026-04-06

Please refer to the tentative course schedule for due dates for homework (HWK), exams/tests, paper and final which must be taken to pass the class.

Note, depending on class progress and learning objectives, as your Professor I reserve the right to change the dates of all these requirements.

Date changes will be made in McGraw Hill Connect which in turn will transmit these changes to D2L. Students need to be checking D2L at least weekly for any updates to the due dates of all your requirements.

While a slightly greater share of your grade will be determined in the second half of the semester (final, paper, exam 4, remaining homework), if you are doing poorly through the first half of the semester, you should discuss with me and/or your advisor on whether to withdraw from the course. **The last day to withdraw is April 14, 2026.**

Final Exam or Final Project Date

Lone Star's final schedule is determined by the College and times/dates will be communicated by me when known. Final is comprehensive and must be taken to pass the class!

Paper as noted in tentative course schedule is due no later than Thursday,

April 23, 5 PM. If paper is not received by due date you will unfortunately receive a zero grade on the paper. Paper guidelines will be discussed in class and posted in the miscellaneous module under the course content in D2L. My suggestion is you start thinking about a few topics 4 weeks prior to the due date, do some preliminary research (the business librarian in building F is very helpful - I advise consulting the librarian for help) and based on that research chose a topic. Paper should take roughly 12 to 14 hours between research, organizing your research, drafting the paper (about 5 pages with references) and finalizing the paper.

Grade Determination

Course Assessments

Your grade will be determined by the following course requirements:

- Exams:
- Homework:
- Paper:
- Final Exam:

Grade Determination			
Your grade will be determined by the following	Details		
	All homework, exams and finals must be taken on-line via D2L to McGraw Hill Connect. Connect automatically grades this work and submits grades to D2L grade book. Paper	Points (if applicable)	Percent of Final Average

	should be upload to a Paper designated module in D2L under course content or if you have a problem, email and I will manually grade. Once you open an assignment it must be completed within the designated time. Check D2L for due dates		
Exams	4 exams covering ~3 to 4 chapters. The third and fourth exams are more challenging than Exams 1 and 2 so have greater weight (Exams 3&4 ~11.2% each, total 22.4% vs. Exams 1&2 ~8.8% each, total 17.6% for exams 1&2).		40
Homework Assignments	Every Chapter has a homework that is equally weighted of your Final Grade.		20
Paper	Due toward end of semester and covers an appropriate Macro topic with suggestions discussed in class. Approximately 4 to 6 pages including reference listing. Guidelines will be in the		10

	Miscellaneous Module under Course Content.		
Final	Will be comprehensive, must be taken to pass class.		30
Note	Students should take the exams on their own – jointly taking an exam is Cheating!! Paper must be completed on your own- plagiarizing is Cheating!!		
Total:			100%

See the Tentative Course Schedule for course assignments and due dates

Extra Credit (your discretion if you wish to do - it is not a course requirement)

Two options to earn extra credit (points added to your final grade) and you can do both options. Option 1 pertains to attendance. I'll take attendance at the beginning of each class – if you're present which also means you remain in the class and you miss no more than 2 classes I'll add 2 points to your final grade. So an 88 final grade a B can be pushed to 90 an A. Option 2 – doing the Smart Book/SB assignments- in D2L/Connect – they're noted as Chapters. This is a very good learning tool but will add time to reading the chapter. There are 15 SB/Chapter assignments each worth 10 points. I will take 3% of your SB total points and add that your final grade. So if you do all 15 SB/Chapter "times" 10 points "times" 3%, will add 4.5 points to your final grade; 7 chapters, 70 points 2 points to final grade. If you chose not to do the SB assignments it will not impact your final grade – again your choice.

Note at the end of the semester I will need to manually add any extra credit to your final (adjusted) grade (numerator) in the D2L grade book. McGraw Hill Connect does transmit SB chapter credits to D2L but D2L doesn't calculate the actual extra credit points.

Final Letter Grade

Final course grades will be awarded using the chart provided below.

Grade	% Weighted Average Grade
A	90 and above
B	80 to 89
C	70 to 79
D	60 to 69
F	under 60

Instructor and Course Policies

Classroom Behavior: Your young adults in college, not HS students any more. RESPECT, HONESTY and taking RESPONSIBILITY!! Those are the actions I expect for/from everyone in the class. Do the homework assignments, complete the exams on your own and by due dates, take the final on your own and by due date, do the paper independently. It also means you make an effort to show-up to class on time and make an effort to participate when I ask a question or raise a question!!

Attendance: As you've chosen to take an in-person class I would expect you to attend the class. I will take attendance and if you attend 12 or less of my classes (about one half of total) I reserve the right to deduct up to four points from your final grade – why sign up for an in-person class and never show up. I would encourage your attendance for a few reasons: As stated in the syllabus you can earn extra credit points depending on how many of my classes you attend; I believe there are some learning benefits to attending class as I not only cover the subject matter but try and tie in examples from my 40 years of business experience to our economics material; and, there

are social benefits from interacting with your fellow students and you should start getting into the mind-set of attending classes as your more advanced classes will likely require your attendance.

Electronic devices: You may use your computer to take notes, follow the chapter in the text or query on something being discussed in class. I do not expect you to review non-class information in the class. If I see you using the computer for non-class information we will discuss after class. If I have to discuss this more than once I will ask you to not bring your computer to class. You may bring cell phones into class and periodically monitor them for a minute or two. If I find you're constantly looking at your phone I will discuss this with you after class.

If I discuss this more than once I will ask you to give me your cell phone at the beginning of class and I will return it at the end of class.

Briefly talking with your neighbors is fine – talking that becomes a distraction is not. If I feel your talking has reached a level of distraction I will discuss with you after class. If I warn you a third time I will subtract 2 points. This all pertains to respect.

Below is a brief description of each major course requirement:

Exams: There will be 4 exams over the semester, each covering ~3 to 4 chapters of material

Homework: There is a homework for each chapter of the syllabus

Paper: This will be due toward the end of the semester covering an appropriate Macro topic and entails about 4 to 6 pages which includes a listing of references. Information on the paper will be provided in class. As you know about the paper weeks before it's due, if you miss the due date you will receive a zero on the paper – please don't ask for an extension, it

won't happen!

Final: Comprehensive, taken at end of semester. Must be taken to pass class!

All homework assignments, exams and final must be accessed through D2L under the Course Content. Under the Content you'll see separate modules for each exam and the homework assignments associated with the exam. Clicking on the homework or exam takes you to them within McGraw Hill Connect. Connect then transmits your grade to D2L's grade book.

Make-up Assignments: You should always be checking D2L on due dates! You're given multiple days to complete your homework assignments and 4 exams so make-up policy is very limited. If you look at the course calendar below, you'll see that all chapter homework assignments linked to one of the 4 exams are due just prior to the exam. As a result, you have a number of weeks to complete the homework assignments linked to an exam. While I strongly advise you do the homework as you cover the chapter as opposed to waiting just before the due date, that's your decision. Since you have a number of weeks to complete the homework assignments, you can only request two homework make-ups by emailing me no later than 2 days after the due date and completing the make-up by the time I extend it. All missed homework assignments receive a zero unless you get an extension. I will give you an extension on one of the first 3 exams – there is no extension on the fourth and last exam as it's too close to your final. You have a number of days to take an exam, although once you open an exam you have to take it in the assigned time. If you miss the deadline on one exam if you email me at Carl.Wechter@lonestar.edu within 2 days of missing the deadline I will give you a one-day extension to complete the exam. If you miss the deadline on more than one exam your grade will be zero on all future missed exams. Please don't make a verbal request for an extension – it must be an email as

noted. The final must be completed by the due date that is listed. If you don't take the final as noted, you automatically fail the class per BASS policy. If you have a valid reason for missing the final, I will discuss with my Chair on whether to give you an extension. Any missed homework or exam will be given a grade of zero which I may need to manually insert in the D2L grade book toward the end of the semester (technically a programming change should transmit a zero grade from McGraw Hill to D2L). Be aware until I add any zero grade into D2L, your D2L average may overstate your average.

Use of AI: In this course, artificial intelligence (AI) tools such as ChatGPT, Google Gemini, and Microsoft Copilot may be used in a limited and guided capacity with instructor permission. The following guidelines must be followed: • Do not copy and paste AI-generated content and submit it as your own. Doing so is a violation of academic integrity and will be considered plagiarism. • AI may only be used with instructor guidance for certain assignments and specific purposes (such as brainstorming, outlining or revising). You may use AI to help research your paper but you still need to use at least 3 other sources to support your paper and you must follow the requirements stated in the first point. **You should not use AI** to help with your exams, Final and homework – that is **cheating**. • Follow assignment-specific instructions regarding AI use. If the instructions do not explicitly mention AI use, it is to be considered not permitted.

Lone Star College Policies

Attendance

Federal Legislation requires Lone Star College to verify attendance for students who receive financial aid each semester. If you are receiving financial aid, you must participate in an academically related activity in each course by Official Day of Record (ODR) of the enrolled semester.

Attendance Drop (NA)

If you do not attend class or participate in an academically related activity by the

Official Day of Record (ODR), you will be dropped from your course and may lose financial eligibility for the semester. Any financial aid funds disbursed to you or your account must be returned to the U.S. Department of Education.

Academically Related Activities (FSA HB Sept.2019)

Academically related activities include, but are not limited to, physically attending a class where there is an opportunity for direct interaction between the instructor and students; initiating contact with a faculty member to ask a question about the academic subject studied in the course; participating in an online discussion about academic matters; submitting an academic assignment; taking an exam, an interactive tutorial or computer-assisted instruction; or attending a study group that is assigned by the school. Academically related activities do NOT include activities where a student may be present, but not academically engaged, such as logging into an online class without active participation, participating in academic counseling or advisement, living in institutional housing, or participating in the school's meal plan. In a distance education context, logging into an online class is not sufficient by itself to demonstrate academic attendance by the student. A student must participate in class or otherwise be engaged in an academically related activity, such as but not limited to, contributing to an online discussion or contacting a faculty member to ask a course-related question via approved communication channels. Completion of an online orientation or syllabus quiz constitutes attendance.

Syllabus Disclaimer

It is the instructor's right to modify the course policies and schedule as necessary to meet the course learning outcomes, therefore, this syllabus is subject to change. Students are encouraged to read the Student Handbook and LSC Catalog for a comprehensive list of college guidelines, policies, and procedures. Prominent policies and their corresponding links are provided in the table below.

The following is a link to all LSC policies listed in the table

Lone Star College Policies

Policy	Description & Link
Academic Integrity & Dishonesty	Lone Star College promotes the importance of personal and academic honesty from its students, instructors, and faculty members as defined in the College's Academic Integrity and Dishonesty Policy . Detailed information for students can be found in the Academic Integrity brochure .
Student Code of Conduct	Lone Star College students are expected to follow the Student Code of Conduct . Violation of conduct policies can result disciplinary action, up to and including suspension.
Course Withdrawal & Six Course Drop Limit	Undergraduate students enrolling as first-time in college students at a public institution of higher education in Texas will be limited to a total of six dropped courses during their entire undergraduate career. Lone Star College uses the term "withdrawal" to refer to a dropped course. Withdrawals occur between the official day of record (ODR) and the posted withdrawal "W" day for the course. Withdrawing from a course will result in a grade of "W" on the official transcript. Drops/withdrawals prior to the official date are not considered "dropped" courses and are not posted on the transcript. No credit will be awarded for a course earning a "W." It is the student's responsibility to withdraw prior to the course's "W" date. Lack of attendance does not constitute as a withdrawal.
Course Evaluation	Course evaluations are the students' opportunity to provide feedback about their experience in the course. The evaluation questionnaire can be accessed through "Links" under the Student menu in myLoneStar .
Academic Appeals	An academic appeal is a formal request brought by a student to change a grade or to challenge a penalty imposed for violation of standards of academic integrity. Students have 12 calendar months from the date the grade was posted by the registrar to submit an academic appeal. Detailed information can be found on the College's Academic Complaint and Appeal Process page

Policy	Description & Link
Family Educational Rights and Privacy Act (FERPA)	The Family Educational Rights and Privacy Act (FERPA) is a Federal law that protects the privacy of student education records. Under FERPA, records may not be released without consent of the student. Additionally, Lone Star College is permitted to release certain “ directory information ” without student consent. Detailed information and consent form may be found on the Syllabus Policy page .
Title IX	Title IX is Federal legislation that helps protect individuals from discrimination, including but not limited to, acts of harassment and violence, based on sex in education programs or activities. Lone Star College strives to create and provide a safe and supportive learning environment for all students following the guidelines under Title IX. Detailed information can be found on the College’s Title IX page .
College Safety & Security	Lone Star College is committed to providing a safe environment in which to learn, study, and work. The LSC Police Department provides information and resources related to the College’s safety and emergency procedures.
Campus Carry	Lone Star College has established rules and regulations regarding enforcement of the Texas “Campus Carry” law. LSC prohibits concealed carry in some areas of LSC campuses, known as exclusion zones. Detailed information can be found on the LSC Campus Carry page .
Student Services Complaint	Lone Star College provides a structured and transparent process for students to submit complaints and appeals concerning academic, non-academic, and administrative matters. The institution ensures that all complaints are addressed in accordance with applicable policies and procedures, and offers avenues for internal resolution as well as external recourse through the Texas Higher Education Coordinating Board, where appropriate. Detailed information can be found on the Student Complaints web page.

Disability Services

Lone Star College promotes equity in academic access by implementing reasonable accommodations. Students requesting disability or pregnancy-related accommodations must contact the Disability Services Office to self-identify and request services.

[Requesting Accommodations](#)

[Additional Accessibility Services and Resources](#)

Student Support Services

One of our cultural beliefs is [Student Focused](#), which means Lone Star College is committed to your success. If you are experiencing challenges achieving your goals academically or personally, please know that Lone Star College has resources to support you. The table below lists the support services available to students. Additional resources may be found on the [Student Resources](#) page.

Tentative Course Schedule

The following course calendar is a guide only. As this is a 14-week class

you may find the pace of this course fairly demanding. While every attempt will be made to follow this class calendar it will be the instructor's prerogative to make any changes as may be deemed necessary in order to meet the learning outcomes of the course. This means students are responsible for continually checking in D2L under course content for any updated assignment date/time changes. All homework (HW), exams/tests and the final exam are completed thru 'Connect'----**ONLINE by accessing Connect thru D2L** (for grades to carry over from Connect to D2L grade book you must access Connect thru D2L). Connect then feeds your grades into D2L's gradebook - you should periodically check that your grades are being populated. Note once you open your exam or Final you must complete it in the time specified. The Final is mandatory – you must take it to pass the class!

Your paper is the one assignment outside of D2L. I've established a Paper Assignment Submission Module under Course content and ideally you will upload your paper into that Module. If you have a problem uploading, then you may email the paper to me (at Carl.Wechter@lonestar.edu) by no later than 4-23 5 PM . If you don't submit by the date/time stated, I will unfortunately have to give you a zero grade. I will manually input your paper grade. While I will try to fully cover the course material in class primarily thru slides/discussion, given this is a 14 week class that will be difficult - as a college student you are responsible for covering any material not covered. All slides will be posted, questions welcomed! I will manually add any extra credit points and any deductions for poor attendance in D2L at the end of semester.

Tentative Class Schedule

Week Number/ Class Dates (14 week semester - cover 15 chapters)	Assignments (details listed under Subject Matter)	Readings and Subject Matter (note, time permitting we'll do some problems in class)
1		
Tu/Th 2-3/5		Introduction to Economic/ Markets Chp1, Appendix on graphs &2 Markets & Circular Flow
2		
Tu/Th 2-10/12		Markets and Circular Flow cont, Demand, Supply, Chp 2&3
M 2-16	Homework Chps 1,2 and 3 Due	
3		
Tu/Th 2-17/19		Introduction to Macro, Macro Measures Chp 6&7
Fr 2-20	Exam 1 Due Chps 1-3	
4		
Tu/Th 2-24/26		Macro Measures con't, Econ Growth Chp 7&8
5		
Tu/Th 3-3/5		Bus Cycles and Basic Macro Rel Chp 9&10
Sa 3-7	Homework Chps 6,7 8 & 9 Due	
Tu 3-10	Exam 2 Due Chps 6,7,8&9	
6		
Tu/Th 3-10/12		Basic Macro Rel cont, Aggregate Exp Chp 10&11
7 Tu/Th 3-17/19	Spring Break No Classes	
8		
Tu/Th 3-24/26		Aggregate Exp cont, Supply and Demand Chp 11&12
9		

Tu/Th 3-31/4-2		Aggregate S and D cont, Fiscal Policy Chp 12&13
10		
Tu/Th 4-7/9		Fiscal Policy cont, Money, Fed & Interest Chp 13&14
Fr 4-10	Homework Chps 10,11, 12&13 Due	
Tu 4-14	Exam 3 Due Chps 10, 11, 12&13	
11		
Tu/Th 4-14/16		Money, Fed & Interest cont, Monetary Policy Chp 14&15
12		
Tu/Th 4-21/23		Monetary Policy cont, Extending Analysis S&D Chp15 & 17
Th 4-23	Paper Due no Later than 5 PM	
13		
Tu/Th 4-28/30		Extending Analysis of Agg S&D, Chp 17, International Trade Chp 19
14	Last Week of Classes	
Tu/Th 5-5/7		International Trade Chp 19 con't and review if time available
Sat 5/9	Homework Chps 14,15, 17& 19 Due	
Sun 5/10	Exam 4 Chp 14, 15, 17&19 Due	
15	Finals Week 5/11-15	Final Must be taken to pass class!
	Date, time/location to be determined and communicated. Check D2L!	
16	Grades Due
